CAMP BEAGLE

A roadside protest camp, heart of a peaceful exposure and pressure campaign, with clear objectives:

- Shut down the MBR Acres site
- Ban animal testing in the UK

Running 24/7 since early July 2021 outside the gates of Marshall BioResources' puppy breeding site in Cambridgeshire.

The strategy is to expose the government-backed secrecy of the barbaric animal testing industry to our animal loving public through peaceful protest, public awareness and challenging the law through judicial process.

Breeding Puppies for Experiments

A global American corporation owns the biggest industrial beagle puppy breeding facility in the UK (their chilling website is www.marshallbio.com).

They are selling industrially bred 'pathogen free' puppies to testing labs, which means they **NEVER GO OUTSIDE**, touch grass, or feel human affection.

Behind closed doors they suffer their blood being drained for sale, vocal chords cut for silencing, and c-sections to meet order deadlines. From here the survivors go direct to the toxicity testing labs for a short life of living hell.
